

Hosted ACD Solutions

Specialist hosted solutions for financial advisers, distributors and fund managers

IFDS Managers provides a host management service to organisations looking to provide a collective investment scheme but lacking the resources or experience to provide the oversight, capital and other requirements needed when hosting their own funds.

IFDS Managers provides services as the Manager of Unit Trusts or the Authorised Corporate Director (ACD) of open-ended investment companies. IFDS Managers then has the regulatory responsibility for the compliant operation of the funds but is effectively supporting the sponsoring firm that seeks to manage its client's assets through the medium of a collective investment scheme.

In providing the host management service IFDS Managers Ltd is an Authorised Fund Manager (AFM) for the collective investment schemes. Our aim at IFDS Managers is to offer a complete administration and regulatory service allowing our clients to focus on delivering outstanding investment performance and/or fund distribution.

at a glance

- 'Out-of-the-box' funds service covering all necessary administration under a single set of contracts
- Support Distributor Influenced Funds (DIFs), fund manager boutiques and new market entrants
- Leverage services from the UK's leading fund service provider
- Available for UCITS, NURS & QIS fund structures
